Tim,
Thanks for your call this evening.
NDEE senior management officials should have Erin Weekly and Dave Cozad's contact information. If there has been a recent change to the historical / ongoing waste release situation (ongoing for several years) NDEE officials should be discussing the situation with R7 ECAD.
Thanks
Ken

Hi Randy, thanks for sharing. I noted it on the spill report this morning but hadn't had a chance to ask about it yet. It's not surprising given what we know of conditions at the plant right now (not operating but cycling grain to try to keep pipes from freezing.) Glad to hear NDEE is following up. We will touch base with them during a call scheduled for Tues.

Tim Curry had an NRC call early this morning concerning the Alten facility near Mead, Ne. I subsequently received an inquiry from the USFWS. I then received a call on the EPA R7 spill line from NDEE's Kirk Morrow, which was to alert me as phone duty officer to some of the back ground of this facility. I spoke with Ken Buchholz and he suggested I send the recent history out....

I have attached the report. Also I talked with Neil Hiel and he indicated the state has been investigating a stillage issue with ALTEN regarding its left over solids from ethanol generation. Seems they were generating ethanol from pesticide treated corn seeds and spreading the stillage on fields. There were some pesticide residue issues that resulted from this process. The NDEE indicated they will be following up on the spill report.

Morning Randy,

Can you provide me what you received on the AltEn manure and stillage?

Amanda

Region 7 ER Report: February 12, 2021

R7 State EOCs:

State	Ops at EOC	Phone Duty Officer Ops
Kansas	State EOC is still operational. ESF 10 is still activated and participating remotely for all briefings. All staff have returned to work and are working remotely as much as possible; with a limited number of staff in the office. KDHE has resumed site-work and limited staff travel to areas not identified as COVID-19 hotspots.	PDO (spills coordinator) is in the office and taking spill line calls through routine methods. After-hours PDO is staffed by the Spill Coordinator and assisted by other staff. District offices are working spills through routine methods.
Nebraska	NDEE is in normal work status. Offices are open to the public and will remain open. NDEE has completed the move of its new Lincoln office. The office is fully open. Most NDEE employees are working their normal	The main number for NDEE (402-471-2186) will still be answered (8-5 Monday through Friday) and transferred as before. NDEE Emergency Response Program Activities will not be affected. However, individual phone

	hours at their office workstations (COVID-19 specific remote-work policies will continue to be implemented).	numbers will most likely go to voice mail and then forward to e-mail; callers are encouraged to leave messages
Iowa	State EOC is open virtually with only EM staff regularly on-site. Briefings are no longer being held unless necessary. EOC taskings are being conducted virtually through WebEOC.	Spill line is being answered as normal. The Iowa DNR is in Phase 1 of Return to Work Plan (<25% in office), other staff remain AWL. Need for response evaluated at time of call as normal.
Missouri	State EOC currently open. ESF 3 and 10 not currently staffed but maintaining awareness of ongoing operations.	PDO taking spill line calls from alternate work location(s). Will have delayed response times due to teleworking of all responders.

Significant Events:

No Current Significant Events.

R7 Responders and Phone Duty Personnel for the Week:

R1 – Doug Ferguson

R2 – Joe Davis

Day Phone – Randy Schademann

Weekend Phone – Tim Curry

REOC Status: Level 2, Type 4: Virtual and partial REOC activation to support regional COVID-19 related activities

Weather Outlook:

Extreme cold temperatures expected throughout the region. For the Kansas City area forecast, go to:
